

## Blömker Hybrid Sleeves

This premium sleeve uses the same technology as the original robust sleeve design. The addition of a stronger than steel, carbon fiber technology inner core, adds the following benefits:

- 20 - 25% Lighter than the standard sleeve.
- 40 - 45% Lighter than the standard competitor sleeves.
- The carbon fiber core is 3 times the rigidity of the fiberglass core.
- Allows for tighter tolerances and less deflection.

### Best Applications:

- Wide web applications.

### Where;

- High speed printing requires improved rigidity.
- Tighter balance tolerances are required.
- Improved bounce prevention.
