ANILOX CARE

SHIPPING | HANDLING | RECEIVING

RECEIVING

Thoroughly inspect the shipping package.

- Approve package before shipping company departs.
- If damaged, write a detailed report with photos and time.

DAMAGE HAPPENS

Examples of damage done in the shipping process:

Crushed Packaging

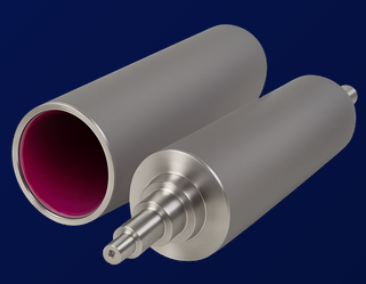

Water Damage

Cracked Components

UNPACKING

Inspect all components carefully as you unpack.

- Handle with care when removing from packaging
- Use cutters carefully to avoid scoring the anilox
- Transfer immediately to a secure storage rack
- Record anilox specifications for easy identification
- Organize and document each shipment

HANDLE WITH CARE

Approximately 80-85% of Anilox re-works are due to some form of damage (very few Anilox Rolls wear out).

Handling Anilox Rolls with proper care can significantly reduce annual costs by extending the life of the roller.

EXPERT CARE. LONGER ANILOX LIFE.

Contact Interflex for technical sales and service expertise to help maximize anilox performance and extend roll life.
